**Cat5E vs Cat6 vs Cat6A**  
Cat5e cables are suitable for Cable runs of up to 100 metres for Ethernet speeds of 10/100/1000 Mbit/s. In addition to the Cat5E capabilities, Cat6 cables are suitable for cable runs of up to 55 metres for 10 Gbit/s Ethernet. Cat6A cables were designed to allow the full 100 metres run for 10 Gbit/s.  
When buying patch leads, always match them to the specification of currently installed cabling. There is no benefit in adding Cat6 patch leads to a Cat5E cabling system. The Cat6 cables will work and if you are looking to upgrade the cabling before too long, then maybe it's worth buying the higher grade patch leads, otherwise, match them to your cabling.

## CAT-5 Economiser Coupler

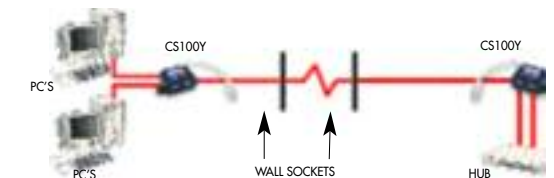

### CAT-5e Cable ECONOMISER - attach two PC's to one CAT-5 cable

#### Description

Our CS100Y takes advantage of the 'redundant' pair in current 100 & 10 Base-T networks by allowing a single run of twisted pair cabling to support two devices. Please note that these devices must be used in pairs. We are able to supply other pinning variants for these units, please contact our technical team to discuss your requirements.

## Voice Adapters (suitable for Structured Wiring Applications)

## Technical Tips

## PSTN or Full Master

These adapters have Surge Arrestors fitted to disperse any spikes from the telephone line coming into the building. The integral bell capacitor fitted between one of the lines and the UK bell link connected to the telephone makes it ring. The resistor fitted from the capacitor to the other line, remotely detects the line's availability.

## PBX Master

Similar to the PSTN Master but without the Surge Arrestor since the PBX usually contains its own protection.

## Secondary

These adapters do not have components and serve merely as extensions from a mastered telephone. PBX systems which do not require the bell capacitor or when the mastering is done at the patch panel.

**Custom Cables ...at your fingertips**

If you can't find the cable you need, we will build it for you and from your own designs. Alternatively, we will do all the research, then design it from scratch and build it for you!  
We won't stop until you have the cable you need!

For more details please contact our Technical Support Team on 01908 561400

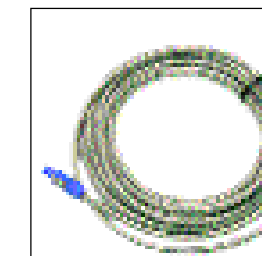

## CUSTOM CABLES

BetterBox® is able to manufacture custom cables to your requirements. Whether you require standard connectors or highly specialised MIL specification connectors, we are able to help. Remember, its not just network connectors that we can supply. We can supply cables with just about any type of connector, from network, power, video, audio, RF and many, many more.

With all custom cables being built in house in the UK, we can guarantee the quality of the cables and are able to react quickly to urgent requirements.

We can manufacture whatever amount you require, just a single cable or even thousands. Speak to one of our engineers on 01908 561400 to discuss your requirements.

See below for a selection of previously made custom cables.

### Multimedia Patch Panels

Save valuable space in your network cabinets with our multimedia patch panels. Instead of using multiple 16 port patch panels when you only need a few ports of each type, contact us to get a quotation for a custom made panel to your exact specifications. We can supply patch panels with DB type cutouts or through connectors.

#### 16 Port DB Style Co-axial Panel

We can supply patch panels with co-axial type cutouts or through connectors.

#### 16 Port Co-axial Panel

#### 16 Port Fibre Style Panel

Combine all types into a single panel, saving both money and space. Speak to our Technical Support Team on 01908 561400 and they can design a panel to your exact requirements.

We can design and build panels with any combination of connectors in a single panel, so for example, you could choose a design with say 5 x DB9 couplers, 6 x ST fibre couplers and 8 x coax couplers all in the same panel. We have many more connector types that can be incorporated into the panel such as RJ45, USB, RCA, most fibre connectors, F type, S-VHS, etc.

Give our engineers a challenge with your unusual requirements!
